# Cold Plasma Technology™

ClimaTemp's "Patent Pending" Cold Plasma line of portable air conditioners are the first in the industry to utilize Needlepoint Bi-Polar Ionization Technology. This technology utilizes active purification by creating and releasing millions of positive and negative oxygen ions into the air. These ions seek out and attach to pathogens such as viruses, causing a chemical reaction on the surface of the cell membrane. This deactivates the viruses, rendering them harmless, so they can no longer spread or cause infection.

Due to the small size of viruses, many filtration technologies are unable to trap viral particles. As bipolar ionization is non-selective, it offers a unique and safe solution to kill airborne and surface viruses 24/7, helping to reduce the risk of disease and infectious outbreaks.

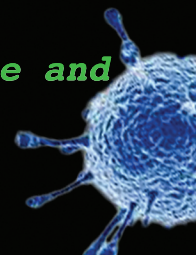

ClimaTemp's Cold Plasma line of portable air conditioners eliminate these pathogens including viruses, bacteria, fungi, and mold as well as Volatile Organic Compounds and odors generated by cooking, smoking, and cleaning.

With overall safety in mind, Cold Plasma Bi-Polar Technology is Ozone Free and 100% safe for people and the environment.

✓ **The only spot cooler that eliminates and kills both airborne and surface pathogens including....**

- Kills - Viruses & Bacteria
- Kills - Covid -19 Surrogate Virus
- Kills - MRSA Virus
- Kills - Bird Flu (H5N1) Virus
- Kills - Swine Flu (H1N1) Virus
- Kills - Staph Bacteria
- Kills - E.coli
- Kills - C.dif
- Kills - T.B.
- Kills - Mold Spores

- Removes - Pet Odors
- Removes - Food Odors
- Removes - Cigarette & Cigar Odors
- Reduces - Allergens, Dust & Pollen
- Controls - Gases
- Controls - VOC's
- Neutralizes - Static Electricity
- Produces No Ozone
- No Chemicals added
- 100% Safe for people and environment

## Rental & Sales

Cold Plasma Technology  
available in our CT-12 spot cooler
